

## *Integrated Management System Policy*

The purpose of BIOAGRA S.A. - together with its "Goświnowice" Ethanol Plant - is to constantly satisfy the needs, requirements and expectations of customers in terms of the quality of our products and the development of production of new products. The important element of our business is also care for safety at work and minimizing the impact on the environment.

*These goals are achieved through:*

- *continuous improvement of the effectiveness of the Integrated Management System,*
- *continuous improvement of employees' qualifications and awareness along with rational use of financial resources,*
- *maintaining constant quality of manufactured products,*
- *the use of modern technology and the introduction of technical and technological progress,*
- *compliance with applicable legal requirements regarding food safety, feed safety and hygiene, environmental protection, OHS (Occupational Health and Safety) and other regulations applicable in our business,*
- *improving the work safety of employees and other people staying on the plant premises, including by recording potentially accidental events, preventing accidents at work or illness,*
- *conducting production activities with aim to minimize the impact on the natural environment and surroundings, including through the implementation of commitments made to the local community,*
- *reduction of GHG emissions.*

The above Integrated Management System Policy is communicated to our Employees and external companies residing at the Plant. It is generally available and its principles apply to every stage of the Company's operations.
